A woman (Gisa) carried 3500 nuts in her kaross. Divided into 10 piles

Tuma said he & his wife would eat 4 in a day i.e. 700 nuts apiece.

We estimated that 350 nuts weigh 6-7 lbs including the hard shell. (not soft covering) and feel they had ample.

Later there were 200 shelled nuts in a cup. Tuma estimated that a man and his wife would eat 4 cups each in a day.
