Dolls ! <sup>qau qao meq</sup> Nai - last year. I asked about <sup>image</sup> image. They say it is bad to make anything <sup>wood</sup> wood in shape of human being. It is death. Is it that they are merely reminded of death or is there some danger? They do not know this, do not make these things. If a wooden image were made + someone's name given it would the person whose name was given be afraid? No a person would not be worried of a name. He would know it was just an image of image were pierced or burned having been given his name he would say his name is hated. They do not think the harm done to the image would happen to the person himself. Just that this would show someone hate him + hate his name I asked if hair or part of one's own body were harmed his hair or finger nail. That would be dangerous. This an. The person whose nail or hair were damaged would feel very unhappy. If a child did something to someone's hair that would not be regarded as dangerous - only if an adult did so. Burning of hair would prove hated in part of human in owner of hair. If anything happened to owner he would know this was cause. Inflammation of eyes might be caused by this - even blindness
